DRAKEMFG.COM

A machine tool investment is intended to boost productivity but also requires maintenance to ensure that it continues working at an optimum level. With preventive maintenance programs, OEM parts, and a global network of experienced field support specialists, Drake is equipped to keep you productive.

PREVENTIVE MAINTENANCE

Machines kept in good working order are ready for production when you demand it. For a professional OEM checkup, Drake Service is always ready to meet your needs.

The Drake 50-Point Inspection

- Eliminates costly downtime
- Reduces overall maintenance costs
- Identifies causes of process inconsistencies
- Prevents minor issues from becoming major problems
- Extends machine tool service life
- Corrects safety violations

CONTROL SYSTEM RENEWALS

Consider a Drake Control System Retrofit (CS:R) for mechanically sound machines with outdated or obsolete controls.

Drake's basic CS:R package:

- New Fanuc CNC
- Servo Motors & Cables
- Amplifiers
- Glass Scales (X- and Z-axes)
- Spindle Motor & Cables
- Electrical Panel
- Drake PartSmart™ Menu-Driven Software

HOLLOW SHAFT SERVO MOTOR REPLACEMENT

Hollow shaft servo motors are a special production item with a high cost and long lead time. Drake's Hollow Shaft Servo Motor Replacement Service offers a solution at half the cost and a fraction of the time. For Drake retrofit machines requiring a servo motor replacement, consider this one-day field service solution with a Drake service technician. The replacement kit includes motor mount with bearings, motor & cables

OEM PARTS

Premium quality parts mean better performance. Drake's technical support assists with replacement and spare OEM parts for your machine tool.

Drake protects the value of your machine tool investment by offering comprehensive support for the entire machine life cycle.

When you need support, know with confidence Drake will be there.
